Hampton Surgical Disposable Non-Stick Bipolar Forceps

Hampton Surgical Disposable Non-Stick Bipolar Forceps are available in Standard and Slim, offering 15 configurations to cover a range of surgical procedures.

- Proprietary non-stick plating for precise coagulation
- Optimal weight, balance and spring force control
- The bayonet handle, thin tines and beveled tips are designed for excellent visualization of the surgical target

European Bipolar Forceps

Bipolar Forceps

Enlarged wicking structure

Bipolar Forceps with AHT Technology

Competitive forceps without AHT Technology

Controlling heat at the tip by continuously evaporating and condensing the internal working fluid.

With a reusable handle and sterile, single-use gold tips, Bipolar Forceps are designed for procedures requiring precise temperature control. In most delicate procedures, there is no room for error - instrumentation must be of the highest quality.

Isocool Bipolar Forceps don't compromise. By incorporating the Active Heat Transfer Technology along with our gold plated tips, surgeons now have an instrument that enhances their ability to coagulate delicate tissue with minimal collateral tissue damage*.

The Science Behind Non-Stick Forceps

Active Heat Transfer Technology

How It Works: Fluid inside the vacuum tube vaporizes as it transfers heat from the tips of the forceps. Heated vapors move up the tube, through the wicking structure. Vapors condense, releasing heat away from the surgical site. Condensation returns the fluid to begin the cycle again. Without AHT* Technology, temperature at the tips of the forceps can exceed the temperature necessary for tissue coagulation.

European Irrigation Bipolar Forceps

It is well known that depending on the generator and the surface quality of the forceps jaws, coagulated tissue tends to more or less stick to the instrument jaw. This unwanted effect can occur particularly often with liver tissue and is critical in neurosurgery. For these applications in particular, we have designed our Bipolar Forceps with integrated irrigation channel. The coagulation area is irrigated through a built-in irrigation channel inside the forceps branch which can be connected to a standard irrigation hose. By means of this irrigation the sticking of the tissue is substantially reduced and surgical work is made easier.

Advantages of Reusable European Irrigation Bipolar Forceps

- *A universal hub connector allows irrigation tubing to be connected easily.*
- *The ergonomically designed handle provides less fatigue and a well balanced instrument.*
- *Nylon coating resists abrasion and provides superb insulation.*
- *For high visibility our irrigation tube can be recessed into the forceps blank (buried irrigation).*
- *Compatible with all common electrosurgery unit.*

European Irrigation Bipolar Forceps

Tip size can be changed as per your requirement, just add the following extensions
 at tip size of the end of Ref #: **BP** Needles, 0.5, 0.7mm, 1.0mm, 1.5mm & 2.0mm

381-164-IR	Straight Irrigation	0.5, 1.0, 2.0	18.0
381-166-IR	Straight Irrigation	0.5, 1.0, 2.0	20.0
381-168-IR	Bayonet Irrigation	0.5, 1.0, 2.0	18.0
381-170-IR	Bayonet Irrigation	0.5, 1.0, 2.0	20.0

Note: More Bipolar Irrigation Forceps are available use IR extension to any regular bipolar forceps.

Non-Stick European Bipolar Forceps

During the coagulation process, tissue and tips of forceps can stick together. Hampton's non-stick bipolar forceps are made with a special silver alloy and therefore prevent tissue from sticking. Disturbing and time consuming disruptions for cleaning the tips during surgery are thus avoided. Due to the good thermal qualities of silver the temperature of the forceps tips does not exceed 100°C during coagulation, which enhances the non-stick effect. With over ten years of experience we can guarantee that our bipolar forceps do not stick. The non-stick effect remains constant and is not reduced by frequent sterilization. Our non-stick bipolar forceps together with the appropriate connection cables are compatible with all common types of high-frequency units such as Erbe, Martin, Berchtold, Valleylab. Hampton's Bipolar forceps non-stick are available in straight, angled or bayonet shape. Available lengths range from 110 to 300 mm. Tips can be made from 0.25 to 2.0 mm width. Forceps are also available with different measurements as well as with flat pin or 2-pin plug.

Advantages of Reusable Non-Stick European Bipolar Forceps

- *Ten years of experience speak for themselves. Our forceps do not stick – never!*
- *No cleaning during surgery*
- *Especially high thermal qualities*
- *All Non-stick Bipolar Forceps are re-usable and autoclavable.*
- *Compatible with all common electrosurgery unit.*

Non-Stick European Bipolar Forceps

Us Bipolar Forceps

The Hampton's bipolar forceps are available in various lengths and shapes for different surgical and anatomical requirements. The reusable Bipolar forceps make it easy to coagulate tissue. Sticking effects on the tips of the forceps are reduced to a minimum.

Advantages of Reusable US Bipolar Forceps

- *Highly polished tips reduce tissue adherence.*
- *Light closing force causes less fatigue over time.*
- *Nylon coating resists abrasion and provides superb insulation.*
- *Reusable, durable, and designed for multiple uses.*
- *Precision tip alignment aids fine control.*
- *The Instruments is autoclavable.*
- *Compatible with all common electrosurgery unit.*

Us Ophthalmic Bipolar Forceps

Tip size can be changed as per your requirement, just add the following extensions

Monopolar Forceps

Our Monopolar instruments are tested at high volts to ensure proper functioning during the most stringent operations. With the best quality stainless steel, excellent finishing and superior insulation, we provide worldwide guarantee for all our Monopolar instruments.

Advantages of Reusable Monopolar Forceps

- *Lightweight and well balanced to prevent fatigue.*
- *Highly polished tips minimise sticking.*
- *Nylon coating resists abrasion and provides superb insulation.*
- *Precision tip alignment aids fine control.*
- *Compatible with all common electrosurgery unit.*

Disposable Bipolar Forceps

Hampton's disposable bipolar forceps have been designed and tested to meet the practical. The main purpose for offering single-use bipolar forceps is to avoid the risk of contamination while remaining cost effective and utilizing the functionalities of the higher end forceps. Hardened stainless steel provides an optimum spring tension and serves as the basis for a superior instrument.

Advantages of Disposable Bipolar Forceps

- *Lightweight and well balanced to prevent fatigue.*
- *Highly polished tips minimise sticking.*
- *Nylon coating resists abrasion and provides superb insulation.*
- *Precision tip alignment aids fine control.*
- *Cost effective in comparison to re-usable.*
- *All Bipolar forceps available with cable, sterile packed.*
- *Compatible with all common electrosurgery unit.*

Through a non-reflective coating technique the glare produced during laser surgery is significantly minimized. The stainless steel surface is specially prepared keeping in mind the superior coating requirements for our range of laser surgery instruments. Custom sizes and shapes are available as well as partial gold plating services for certain instruments as per customer requirements. Models Available: Graves, Pederson, VU-More, 4-Way, Cusco, Collin, Weisman, Gelpi, Rigby, Lateral, Lateral Vaginal, Endocervical, Iris, Emmet, Straight, two-prong, three-prong, etc.

These E-Z Clean Laparoscopic Electrodes are made from very high quality raw material which ensures hassle free work performance at its user end. These E-Z Clean Laparoscopic Electrodes are widely finds its applications in various medical sectors.

Salient Features of our E-Z Clean Laparoscopic Electrodes

- *Provide excellent dissection and coagulation for a variety of surgical applications.*
- *High-tech PTFE coating for reduced eschar buildup.*
- *Reintroduction during surgery is minimized.*
- *Lower power settings for safer delivery of electrosurgery.*
- *Tips are cost-effective because they Save Time and Money.*

Electrosurgical Pencil & Electrode

Electrode handle with blade electrode for single-use. Sterile packaging in individual Pouches. Ready to use. This handle is made of high quality material and fits into the Surgeon's hand comfortably due to its ergonomic shape. The quality meets highest Specifications and fulfills all required international safety regulations.

- *Single-use electrode handle including blade electrode and 3 m cable (also available: 5 m)*
- *Individually packaged, sterile.*
- *Push buttons for cutting and coagulation.*
- *Unit side: 3-pin connector.*
- *Tips are cost-effective because they Save Time and Money.*
- *Suitable also for use with ERBE, Martin or Berchtold units, by addition of an adapter especially designed for such purpose.*

Electrosurgical Cables

Hampton's Cables are available in disposable and reusable grade. We offer high quality silicon cables even for our single-use instruments thus making sure that all cables are able to withstand electrical current above the standard requirements. Furthermore, numerous tests including continuity and leak test ensures that our cables will work under the toughest requirements. Multiple sizes and plugs are available as per the need of the customer. Our cables are durable, flexible and able to withstand sterilization processes if needed. By following international standards we ensure that our cables are compatible with most major ESU's. Our cables are available in lengths 3 m, 4 m or 5 m.

Electrosurgical Cables

European Bipolar Cable
Instruments Connector: **European Flat Plug**
Generator Connector: **Martin Type**
Reusable Silicon 3m Cable **381-1118**

US Bipolar Cable
Instruments Connector: **USA 2-Pin Plug**
Generator Connector: **Martin Type**
Reusable Silicon 3m Cable **381-1120**

European Bipolar Cable
Instruments Connector: **European Flat Plug**
Generator Connector: **Erbe Type**
Reusable Silicon 3m Cable **381-1122**

US Bipolar Cable
Instruments Connector: **USA 2-Pin Plug**
Generator Connector: **Erbe Type**
Reusable Silicon 3m Cable **381-1124**

Bipolar Cable
Instruments Connector: **Ethicon**
Generator Connector: **4mm Banana Plug**
Reusable Silicon 3m Cable **381-1126**

Electrosurgical Cables

Monopolar Cable

Instruments Connector: **Screw Type**
Generator Connector: **Standard Bovie 8mm Plug**
Reusable Silicon 3m Cable **381-1128**

Monopolar Cable

Instruments Connector: **4mm Female Fitting**
Generator Connector: **Standard Bovie 8mm Plug**
Reusable Silicon 3m Cable **381-1130**

Monopolar Endoscopic Cable

Instruments Connector: **4mm Female Fitting**
Generator Connector: **4mm Banana Plug**
Reusable Silicon 3m Cable **381-1132**

Diathermy Cable

Instruments Connector: **4mm Male Fitting**
Generator Connector: **4mm Banana Plug**
Reusable Silicon 3m Cable **381-1134**

Diathermy Cable

Instruments Connector: **4.8mm Female Fitting**
Generator Connector: **4mm Banana Plug**
Reusable Silicon 3m Cable **381-1136**

Diathermy Cable

Instruments Connector: **4.8mm Female Fitting**
Generator Connector: **Stan. Bovie 8mm Plug**
Reusable Silicon 3m Cable **381-1138**

Bipolar Artery Sealer

- 381-1150** Artery Sealer 6.5"
- 381-1152** Artery Sealer 7.5"
- 381-1154** Artery Sealer 8.5"
- 381-1156** Artery Sealer 9.5"
- 381-1158** Artery Sealer 10.5"

- 381-1160** Non-Stick Artery Sealer 6.5"
- 381-1162** Non-Stick Artery Sealer 7.5"
- 381-1164** Non-Stick Artery Sealer 8.5"
- 381-1166** Non-Stick Artery Sealer 9.5"
- 381-1168** Non-Stick Artery Sealer 10.5"
